C/C++:

PROJECTS

Recipe Web App *React Js*

Developed a recipe web application using React that fetches recipe data through APIs. The application includes various categories of recipes, each with detailed steps.

Gym Web App *React Js*

Crafted a gym web application using React that showcases exercise details categorized by muscle groups, fetching data from an API.

YouTube Backend *Express, MongoDB*

Constructed the backend of YouTube using Express and MongoDB. The backend encompasses multiple routes and models, handling videos and images, and incorporates the logic for all YouTube features.

Spotify Clone: *JavaScript*

Developed a Spotify clone utilizing HTML, CSS, and Vanilla JavaScript, proficiently managing audio files.

ToDoList *Node js, Express, React, MongoDB*

ToDoList is a MERN stack web app for efficient task management. Users can create, edit, and delete lists and tasks, stored securely in MongoDB. The app features a user-friendly profile section for updating details and profile photo. It demonstrates skills in frontend-backend integration, dynamic UI, and user tracking via ContextAPI, marking the start of a journey in web development mastery.

Personal Portfolio Website *React js, Three js*

Designed and built a personal portfolio website to showcase your projects, skills, and achievements. The website features a clean and professional layout, with sections for project descriptions, skills and contact information.
